

Déplacement forcé des Palestiniens: La suspension de la Loi

Description

We live in Umm el-Hieran, a Bedouin village in the Naqab, which was created by Israeli State in 1956. And this is our home, today under threat of demolition because the same State that created the village calls our houses "illegal". As the State Prosecutor said, "Bedouins don't need houses, they live under the stars"... Last night the master plan of Hiran was finally approved, which is set to demolish our homes in our village and build a new, Jewish town in its place. PLEASE SHARE TO SAVE OUR HOMES
